Notice Concerning the Recording of Non-Operating Income (Valuation Gains on Forward Exchange Contracts)

OKUMURA CORPORATION (the "Company") hereby announces that it expects to recognize non-operating income (valuation gains on forward exchange contracts) in its quarterly consolidated financial results for the nine months ended December 31, 2025.

1. Recording of non-operating income (valuation gains on forward exchange contracts)

The gains and losses on mark-to-market valuation of the outstanding balance of the said forward exchange contracts as of the last day of each accounting period is as detailed in the table below. In the quarterly financial results for the nine months ended December 31, 2025, the Company expects to recognize ¥4,688 million under non-operating income in the consolidated statement of income.

(Millions of Yen)

	Fiscal year ended March 31, 2025	Fiscal year ending March 31, 2026			
		First quarter	Second quarter	Third quarter	Fourth quarter
[Last day of each quarterly accounting period] Mark-to-market valuation gains (losses) of consolidated cumulative period	(701)	(1,878)	613	3,987	–
Mark-to-market valuation gains (losses) of consolidated accounting period		(1,878)	2,491	3,373	–
[Last day of previous consolidated fiscal year] Reversal treatment of mark-to-market valuation gains	–	701	701	701	–
Amount recorded in the consolidated statement of income	**(701)**	**(1,176)**	**1,315**	**4,688**	**–**

(Note) ISHIKARI BIO ENERGY GODO KAISHA, a consolidated subsidiary of the Company, has entered into long-term forward exchange contracts as a method to hedge the risk of foreign exchange rate fluctuations in fuel purchase transactions during the business period. Previously, the gains and losses on mark-to-market valuation of the outstanding balance of these forward exchange contracts as of the last day of each accounting period were subject to hedge accounting and recorded in “deferred gains or losses on hedges” in the consolidated balance sheet. However, on July 19, 2024, an explosion occurred in the power generation equipment at ISHIKARI BIO ENERGY GODO KAISHA and, as a result, the said subsidiary no longer met the requirements for hedge accounting. Therefore, the Company suspended the application of hedge accounting from the six months ended September 30, 2024 (the interim financial results).

As a result, gains and losses on mark-to-market valuation of the outstanding balance of these forward exchange contracts as of the last day of each accounting period of ISHIKARI BIO ENERGY GODO KAISHA have been recorded as “valuation gains and losses on forward exchange contracts” under non-operating income or non-operating expenses in the consolidated statement of income.

2. Impact on Financial Results

The valuation gains and losses on forward exchange contracts which are recorded under non-operating income or non-operating expenses in the consolidated statement of income, are subject to significant fluctuations depending on foreign exchange market trends. Accordingly, it has not been incorporated into the consolidated financial results forecasts for the fiscal year ending March 31, 2026, announced together with the financial results announcement on November 13, 2025.

The valuation gains on forward exchange contracts which are described in 1. above, are expected to be recorded in the quarterly financial results for the nine months ended December 31, 2025. However, given the continued uncertainty surrounding foreign exchange market conditions, we will not revise our consolidated financial results forecasts for the fiscal year ending March 31, 2026, to reflect this gain.

3. Impact on dividends

We have decided not to include the valuation gains on forward exchange contracts which are described in 1. above, in the calculation of our payout ratio, in accordance with the Company's shareholder return policy. The Company's shareholder return policy for application during the Medium-Term Business Plan (FY2025–2027) is as below.

Consolidated payout ratio*1 of 70% or more (Dividend on equity (DOE)*2 ratio of 2.0% or more, regardless of business performance)

*1: Consolidated payout ratio = Total annual dividends (interim + year-end) / profit attributable to owners of parent

[Excluding the impact of one-off special factors (valuation gains and losses on forward exchange contracts)]

*2: DOE = Total annual dividends (interim + year-end) / equity
